## CEO Message

The biggest financial news this past quarter came as no surprise, the Federal Reserve did not raise rates and have indicated they expect rates to remain relatively flat for the remainder of the year. This is good news for new home buyers looking to lock in at the still historically low interest rates. This also still may be a good year to refinance your home and take advantage of your home's equity. Recent realtor reports on home values

in Los Angeles show a modest increase of 3% in the last 12-months. In combination with previous year value increases, many home owners could be sitting on a lot of untapped equity. I encourage members to investigate their homes equity to see if they may be able to pay off other debt such as credit cards, auto, and student loan debt with a much lower interest home loan. This will not only save you money, but improve your credit.
